

## FABRICATION

Total Eden Engineering, a leader in water management services, understands that no two clients are alike and therefore specialise in tailor-made solutions that meet our client's unique demands.

Total Eden Engineering offers a wide range of options including in-house fabrication which enables us to provide our clients with the right solution, competitively and to a high standard of quality.

Our fabrication facilities provide us with the ability to be flexible with delivery timelines and ensures that our clients' services are met as quickly as possible thereby minimising the downtime of their water infrastructure.
